Zobel Releases New Coating with Extra UV Protection

Window & Door
October 25, 2016
[Companies](#)

Zobel Coatings released its Zowo-tec 421 Glaze UV+, which contains high doses of UV absorbers and radical interceptors, which filter the damaging UV part of the sunlight spectrum. Consequently, the product itself can be applied as a clear coat outdoors, provided that a coloured primer is used in the layer structure. Likewise, Zowo-tec 421 Glaze UV+ can be used with pigments, particularly recommended by the Zobel coating experts for light colors, such as maple and pine. According to the company, Zowo-tec 421 Glaze UV+ also offers early block resistance, hail damage resistance, transparency and brilliance.
